

Greetings Forster Foundation,

We have no words to express our appreciations to the directors of the Foundation, Bill, Donna and Rabbi Hershberg, for your help!!

we now have the ability to enable more special children here at Tzohar Halev to better communicate their needs.

With your generous contribution of the visual I-pads, they have greatly enhanced the quality of life to many non-verbal individuals.

They can now communicate their needs by using the unique program to express what it is that they need and feel. Their frustration level has greatly decreased thus bringing into the atmosphere a calmness that is having an enormous positive impact on everyone.

It is amazing to see the difference all around, it is evident on the happiness and general upbeat manner that is felt all around.

The I-pads have been a life saver to our schools here at Tzohar Halev!

We would love to be able to provide more children the opportunity to have access to these I-pads so that they can better communicate with their surrounding.

It would minimize some of their daily struggles to survive a world in which they are not always understood.

We are in desperate need of about 20 more of these devices, so that we can provide more effective care to these struggling individuals at different schools we have around Israel.

It will be my pleasure to show you firsthand our amazing program in your next trip to Israel, so you can get a better understanding of what Tzohar Halev is.

Thank you so much again!

Be blessed!

Avi,
