

Dear Baruch and Rabbi Greg and the Miracle iPad Mission,

We are so grateful to be partners with you in creating real miracles for ALEH's children, all of whom have severe intellectual and developmental disabilities and various medical conditions.

Our children have been fortunate recipients of wheelchairs and iPads through your mission.

This year, thanks to the iPads you so generously sponsored, the children are learning new concepts and gaining more independence via programs that enable them to choose the foods and clothes they like, and the activities that interest them. They are also stimulated and entertained during free time, with videos and songs that they enjoy.

One child enjoys watching a video song playing while she eats. This helps her to concentrate and cooperate. Another child has learned to touch the screen and loves watching the rotating pictures, in particular because she knows she is in control.

The iPads are giving our children a voice – to express their wishes and feelings, to make choices, and to enjoy their free time with interesting and stimulating material. For our children, the iPads are a window to the world around them, bringing them new experiences and the glorious feeling of independence and free choice.

THANK YOU deeply for your partnership in this amazing project!
