

Dear Mr. Forster and Forster Foundation,

The medical and nursing staffs of the Pediatric Division at Soroka Medical Center wish to express our deep thanks and appreciation to the Forster Foundation for its generous donation of 18 wheelchairs for children. This gift filled a void that had troubled us and our young patients and their families.

Each day, hospitalized children need to use these wheelchairs, for example to be brought to the radiology department for imaging exams, to participate in educational and experiential activities at the hospital's accredited school located in the Pediatric inpatient facility, and more. Previous to your gift, however, the number of wheelchairs available was limited and insufficient, and pediatric patients and their families often had to wait a significant amount of time to have access to and use of a wheelchair.

The donation of 18 wheelchairs for children by the Forster Foundation has made a significant difference in our pediatric departments and units. Thank you so much!

Sincerely,

Ayelet Nocham, Head Nurse  
Pediatric Division  
Soroka Medical Center
